## Nihon-to Samurai Sword Parts

Parts of a katana Japanese sword.  
Learn the Japanese terminologies of the different parts of a samurai sword

The Samurai sword is an ancient Japanese sword known to be the deadliest weapon of the high-ranked warriors in warfare. These are well crafted and meticulously ornamented. No two Samurai swords are made the same because a sword of the Samurai is a representation of its owner. Because Samurai sword making is sacred in itself, only the blade smiths and craftsmen working for the royals and the elite of the society could forge and create this sword.
